Brake Parts Inc Continues its Commitment to Help the Community

Raises over \$168,000 for United Way

MCHEMRY, III. – April 4, 2017 – Employees of Brake Parts Inc (BPI) continued their commitment to giving back to the community by once again partnering with the United Way of Greater McHenry County in 2016. BPI raised over \$168,000, which marks the fifth consecutive year the company has surpassed the \$100,000 mark.

BPI matched the money that was raised by employees through direct donations and special fundraising projects, including many held at the McHenry, Illinois headquarters. These events included a silent auction, bake sale, “jeans months” where employees paid to wear jeans to work, an office furniture sale, raffles, golf passes, a taco lunch sale, computer sale, brake sale and more.

“Every year, the BPI employees rise to the challenge of raising money for our local United Way chapter, and this year is no exception,” said David Overbeeke, president and CEO of Brake Parts Inc. “I am so proud of the dedication that everyone has made to this important partnership as it helps to better the lives of fellow community members that need the assistance. None of this would have been possible without the planning and help from the BPI/United Way committee and the generosity of every BPI employee.”

Brake Parts Inc has been the largest contributor to the United Way of Greater McHenry County for several years and has received the Landmark Award four times. The Landmark Award was created in 2011 and is reserved for companies who reach an outstanding level of success by raising \$100,000 or more during their United Way campaign. BPI has partnered with United Way for over a decade and looks forward to continuing their tradition of giving.

About Brake Parts Inc

Brake Parts Inc (BPI) is committed to leading the global automotive aftermarket as the premier manufacturer and supplier of brake system components. The company’s primary focus is the growth and profitability of its customers through a collaborative platform of quality, innovation, dedication and integrity. BPI has a demonstrated commitment to research, development and testing of its entire product offering, including friction, rotors, drums, calipers and hydraulic products, ensuring that they meet or exceed original equipment fit, form and function requirements.
